

MTI CLIENTS

MONTEREY TECHNOLOGIES, INC.

Monterey Technologies, Inc. is a Human-Centered Analysis, Design, and Ergonomics firm. Our mission is to focus first on users. We develop functional requirements for people, as the users of technology, and to relate those requirements to the development of technology to provide a human-centered approach to the design of any technology that people use. We believe that technology should be developed to serve the needs of the human user, rather than the people being slaves to the technology.
